FAMILY TREE NURSERY

Mythic™ Lauterbachiana Purple Sword Elephant Ears

Alocasia lauterbachiana

Height: 24 inches

Spread: 3 feet

Sunlight: ◐

Hardiness Zone: (annual)

Other Names: Silver Sword, Elephant's Ear

Group/Class: Leafjoy Houseplants

Description:

Unusual, narrow and wavy leaves are deep green with contrasting purple undersides, emerging in a vertical, upright habit; very exotic looking as a commanding indoor accent plant; great for patio pots in warm weather

Features & Attributes

Mythic Lauterbachiana Purple Sword Elephant Ears' attractive large glossy pointy leaves emerge chartreuse, turning dark green in color with curious purple undersides and tinges of coppery-bronze throughout the year on a plant with an upright spreading habit of growth. The deep purple stems are very effective and add to the plant's interest.

This is an open herbaceous evergreen houseplant with an upright spreading habit of growth. Its relatively coarse texture stands it apart from other indoor plants with finer foliage. This plant usually looks its best without pruning, although it will tolerate pruning.

FAMILY TREE NURSERY

Planting & Growing

When grown indoors, Mythic Lauterbachiana Purple Sword Elephant Ears can be expected to grow to be about 24 inches tall at maturity, with a spread of 3 feet. It grows at a medium rate, and under ideal conditions can be expected to live for approximately 5 years. This houseplant should be situated in a location that that gets indirect sunlight at most, although it will usually require a more brightly-lit environment than what artificial indoor lighting alone can provide. It prefers to grow in average to moist soil. The surface of the soil shouldn't be allowed to dry out completely, and so you should expect to water this plant once and possibly even twice each week. Be aware that your particular watering schedule may vary depending on its location in the room, the pot size, plant size and other conditions; if in doubt, ask one of our experts in the store for advice. It will benefit from a regular feeding with a general-purpose fertilizer with every second or third watering. It is not particular as to soil pH, but grows best in rich soil. Contact the store for specific recommendations on pre-mixed potting soil for this plant. Be warned that parts of this plant are known to be toxic to humans and animals, so special care should be exercised if growing it around children and pets.

There are many factors that will affect the ultimate height, spread and overall performance of a plant when grown indoors; among them, the size of the pot it's growing in, the amount of light it receives, watering frequency, the pruning regimen and repotting schedule. Use the information described here as a guideline only; individual performance can and will vary. Please contact the store to speak with one of our experts if you are interested in further details concerning recommendations on pot size, watering, pruning, repotting, etc.
