Height: 3 feet

Spread: 3 feet

Sunlight: ◐ ●

Hardiness Zone: 10b

Description:

A very popular plant that is very easy to grow; prefers bright, indirect sunlight, protect from hot afternoon sun; medium to dark green leaves are speckled and variegated with light green; great way to add texture to landscapes or containers

Ornamental Features

Mystic Marble Chinese Evergreen's attractive pointy leaves remain green in color with showy light green variegation throughout the season on a plant with an upright spreading habit of growth.

Landscape Attributes

Mystic Marble Chinese Evergreen is an herbaceous perennial with an upright spreading habit of growth. Its medium texture blends into the garden, but can always be balanced by a couple of finer or coarser plants for an effective composition.

This is a relatively low maintenance plant, and can be pruned at anytime. It has no significant negative characteristics.

Mystic Marble Chinese Evergreen is recommended for the following landscape applications;

- Accent

Planting & Growing

Mystic Marble Chinese Evergreen will grow to be about 3 feet tall at maturity, with a spread of 3 feet. Its foliage tends to remain dense right to the ground, not requiring facer plants in front. It grows at a slow rate, and under ideal conditions can be expected to live for approximately 10 years. As an herbaceous perennial, this plant will usually die back to the crown each winter, and will regrow from the base each spring. Be careful not to disturb the crown in late winter when it may not be readily seen!

FAMILY TREE NURSERY

This plant does best in partial shade to shade. It does best in average to evenly moist conditions, but will not tolerate standing water. This plant should not require much in the way of fertilizing once established, although it may appreciate a shot of general-purpose fertilizer from time to time early in the growing season. It is not particular as to soil type or pH. It is quite intolerant of urban pollution, therefore inner city or urban streetside plantings are best avoided. This particular variety is an interspecific hybrid, and parts of it are known to be toxic to humans and animals, so care should be exercised in planting it around children and pets. It can be propagated by division; however, as a cultivated variety, be aware that it may be subject to certain restrictions or prohibitions on propagation.
